

Ten years ago Gerry's dentist stopped lifting patients from their wheelchair into the dental chair. As a consequence he simply stopped getting any dental attention. When the CP Rochester Dental Clinic opened Gerry was one of the first patients. He was thrilled by the ceiling track lifting system, commenting, "This is great. This makes it easy on all of us." All Gerry sorely needed was a simple check up and cleaning. Everyone noticed the difference in Gerry. Not just in his smile and appearance but also in his self-esteem.
